Introduction

We created NutriConnect as a web-based platform to make personalized nutrition accessible, connecting you directly with certified dietitians for tailored dietary guidance. Our mission is to empower you to live healthier through virtual consultations, custom meal plans, and interactive tools that make nutrition a sustainable habit. We've built it on a scalable MVC architecture to ensure a smooth, responsive experience whether you're on desktop or mobile. Our platform encourages real-time interaction, progress tracking, and community engagement with a blog full of nutrition tips and recipes. With a vibrant green-themed UI, featuring Emerald Green and Dark Green accents, we've designed it to inspire wellness and vitality.

Business Model

We designed NutriConnect with a dual business model to ensure seamless service delivery and accessibility:

- **B2B (Business-to-Business):** Our platform facilitates collaboration between admins and certified dietitians, streamlining consultation management and professional coordination. We take a 20% commission from the consultation fees dietitians earn from users, ensuring efficient onboarding, verification, and high-quality service delivery.
- **B2C (Business-to-Consumer):** We connect clients directly with admins through tiered membership plans, offering access to personalized health services. These tiers provide varying levels of consultations, customized meal plans, and premium features to meet diverse user needs.
- **Future Plans:** We're planning to expand our B2B model with a corporate portal, allowing companies to onboard large numbers of users, enabling bulk access to our services, and generating larger commissions through scaled partnerships.

User Roles : Core Fucntions

Client

Sign up, pick a plan (No Plan, Basic, Premium, Ultimate), book dietitian chats, get custom meal plans, track progress, and join community blogs!

Dietitian

Set up your profile, run virtual consultations, create meal plans, and write expert blog articles. Earn consultation fees, with NutriConnect taking a 20% commission.

Corporate Portal

Enables companies to onboard large user groups for seamless access to NutriConnect's nutrition services.

Drives scaled partnerships with a dedicated interface, boosting engagement and generating larger commissions.

Admin

Manage user and dietitian accounts, verify credentials, and oversee organization partnerships (Pending, Verified, Rejected). Access revenue analytics and coordinate platform operations via a dedicated dashboard.

Organization

Partner to offer group services, manage bulk user registrations, and coordinate with admins for verification.

Monitor engagement and service delivery through tailored dashboards.

Individual Contributions

Members :

PABBU SAKETH (Roll No: S20230010169)

- Developed dashboards for users, admins, organizations, and dietitians.
- Implemented organization verification by admin and dietitian verification by organization.
- Built daily progress tracking and personalized meal plan functionality with user and dietitian access.

Schemas Used: User, Organization, Admin, DietPlans, Progress.

NERELLA VENKATA SRI RAM (Roll No: S20230010164)

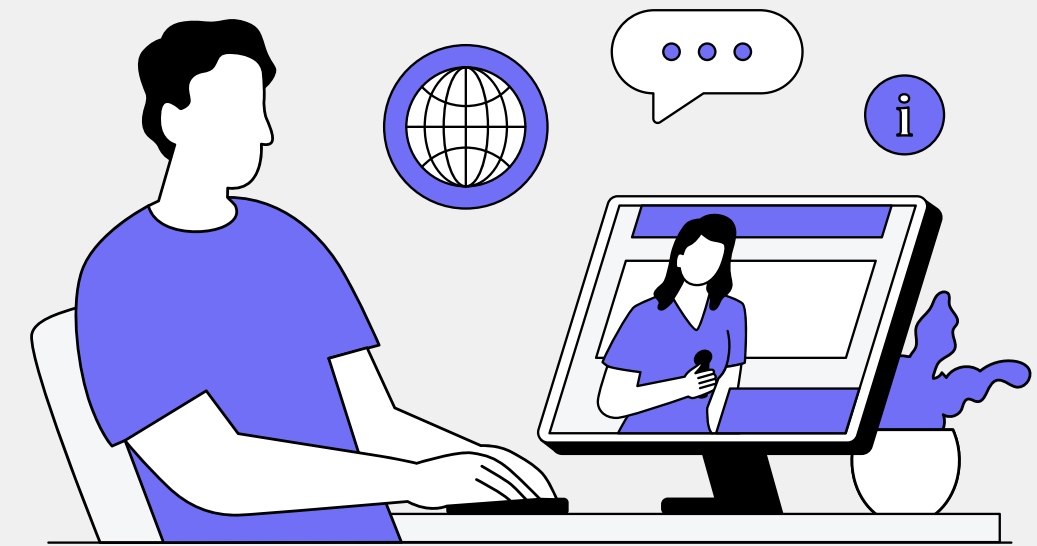

- Created chat interface for client-dietitian communication, including video conferencing links.
- Built blog interface for URL/image uploads with thematic categorization.
- Implemented static chatbot for 100–150 predefined queries.

Schemas Used: Chat, Chatbot, Blogs.

Individual Contributions

Members

INALA SYAMA SRI SAI (Roll No: S20230010104)

- Ensured booking functionality with slot management and conflict prevention.
- Developed diet plan search and dietitian filtering by language, fees, and location.
- Added testimonial functionality for user feedback.

Schemas Used: Dietitian, DietitianInfo, BookedSlots

NULAKAJODU MAANAS ANAND (Roll No: S20230010166)

- Built medical report submission and viewing pages for multiple file uploads.
- Developed queries and contact us page with admin email responses via Outlook/Gmail.
- Managed query handling between users and admin.

Schemas Used: Queries, LabReports.

NITTA PRADEEP (Roll No: S20230010165)

- Created pricing plans page (Basic, Premium, Ultimate) and consultation fees management.
- Built admin revenue tracking for daily, monthly, and yearly reports.
- Managed plan-based functionality for consultations and meal plans.

Schemas Used: Subscription

Thank You
